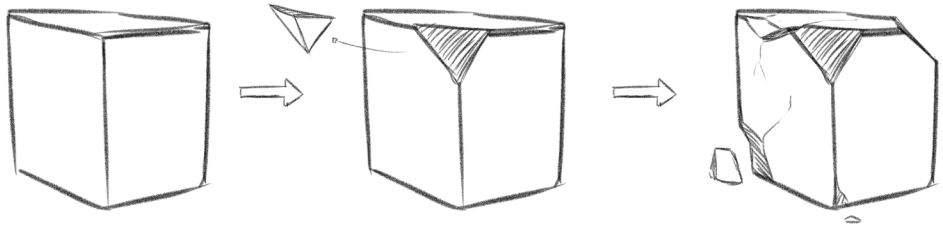
Basics of Drawing

Beginner Drawing Lessons by JeyRam.Org

Welcome to these worksheets! Make sure to do part 1 and 2 of the beginner tutorials over on JeyRam.Org/Tutorial before doing this lesson.

Sculpting

To add more versatility to how we draw forms we can think of the base shapes as slabs of marble and then chop away pieces to create more specific forms. This is a great practice for better understanding how to draw the illusion of 3D on the page.



Let's take some forms and gradually chop away pieces to make them more specific. Copy from the examples and dont be shy about using an eraser!

Practice

For the final page let's draw some complex and sculpted forms, feel free to practice the ones you found the most challenging.

Woo congrats! You finished the worksheet!! If you found this useful you can head over to JeyRam.Org/Tutorial for many more free worksheets just like this one.
Thank you for letting me be part of your creative journey!
